

GRIP PAD®

BC-flute

FRICTION

Sliding angle 44° (NF Q03-083, 1993 *)

According to the friction properties required, the antiskid coating can be declined in various models. The antiskid efficiency stay the same, but only focused on the coated areas.

TESTS	100%	Alternate stripes	DEVIATION
Total weight	650 g/m ²		± 5%
Thickness	6,7 mm		± 5%
Bursting strength	895 kPa		± 5%
ECT compression	6,6 kN/m		± 5%
Dimensions	According to order		± 2%

** Measurement has been hold in conditions of the norm NF Q03-083, non slide side versus recycled paperboard. The friction coefficient is given as an indication. Friction properties are dependent of the surface, the weight of the product and its dimensions. Before validating the product, a test in real conditions of use is required.*

REGULATORY

- Compliant to Directive 94/62/CE
- Compliant to REACH Regulation

ENVIRONMENT

- Issued of recycling fibers 
- Entirely recyclable
- Reusable
- FSC grade available on request

HEALTH

- No toxicity
- No skin irritation
