

is a slip sheet that is used as a substitute for wooden pallets for shipments by truck and container

Why use GRIP N' SLIP SHEET®?

- Transport and store your products without pallet
- Increase your loading volume
- Reduce your purchase and transport costs by 80%
- Secure your products during handling : no slipping of the load
- Preserve the planet : save trees and reduce your CO2 footprint !
- 100% recyclable and reusable

Grip'N Slip Sheet versus Wooden pallets

GNS is 3 times cheaper than a fumigated wooden pallet

1000 GNS = 1m3

1000 pallets = 70 m3

When you load a container by double-stacking pallets, you load 30 cm/m2 of wooden pallets, more than 700 kg of wood in total

When you load a container using GNS, you only load 1.8mm/m2 and 30 kg of kraftliner paper

→ You can load 4 additional pallets per container, so you can save 1 container every 10.

1 GNS = 0.5 kg

1 wooden pallet = 12 to 20 kg

→ You can save up to 640 kg per truck
