

FRICITION

Sliding angle 36° (NF Q03-083, 1993 *)

TESTS		100%	DEVIATION
Fluting direction	Cross direction		
Weight of the composition	Front cover	175 g/m2	± 5%
	Fluting	95 g/m2	± 5%
Total weight		270 g/m2	± 5%
CMT : flat compression		877 kN/m	± 5%
ECT : Crush compression		351 kN/m	± 5%
Dimensions	Available as sheets or rolls		± 2%

* Measurement has been hold in conditions of the norm NF Q03-083, non slide side versus recycled paperboard. The friction coefficient is given as an indication. Friction properties are dependent of the surface, the weight of the product and its dimensions. Before validating the product, a test in real conditions of use is required.

REGULATORY

- Compliant to Directive 94/62/CE
- Compliant to REACH Regulation

ENVIRONMENT

- Issued of recycling fibers
- Entirely recyclable
- Reusable

HEALTH

- No toxicity
- No skin irritation
