

GRIP SHEET®

is a non-slip, protective insert paper sheet used to reduce breakage and protect products distributed on pallets

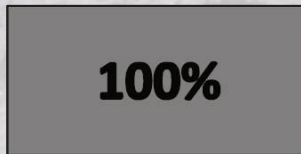

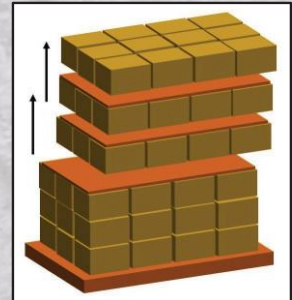

5 reasons to use GRIP SHEET®:

- Increase the stability of your pallets
- Reduce transport damage
- Optimize your packaging costs
- Reduce your plastic film consumption and your environmental footprint
- Works with your automatic palletizing system

Key facts :

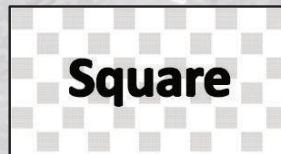

- Tilt angle up to 50°
- Same friction efficiency on both sides
- Recycled, 100% recyclable and reusable, FSC® certified
- Available as rolls or sheets
- Optimises your packing scheme (columns or interlocking)
- Available with different coating patterns according to your needs

Very high friction

High friction

Medium friction

Stabilize any type of load :

- Boxes
- Paper & plastic bags
- Big Bag
- ...

IT'S THE
DOTS
THAT MAKE
THE
DIFFERENCE
